

Custom Design & Building of Presses
Used by the World's Top Manufacturers!

DIE CUTTING – MOLDING & TRIM
HEAT SEALING – EMBOSSING & STAMPING

BRUNOSYSTEMS.COM

Bruno Presses

Bruno presses are used to cut numerous types of materials including (but not limited to) foams, plastics, textiles, paper, cardboard, chipboard, rubber, composites, carpets, etc. They die cut on steel, belts and cutting pads. All press sizes can be built with various feed systems for feeding roll stock and sheet stock.

Bruno presses are manufactured with all steel fabrication that are stress relieved designed and built for heavy production requirements.

Die Cutting Presses

SIZE RANGE:

- 10" to 120" wide
- 10" to 216" deep
- 10 to 4000 tons

PRESS FEED

- Manual Sliding Trays
- Belt feeds
- Clamp feeds
- Roll feeds
- Progressive feeds
- Shuttles
- In-line systems
-

CUTTING SIZE:

- (L-r): 10" to 120"
- (F-B): 10" to 216"

MATERIAL HANDLING:

- Manual or automated
- Straight hydraulic or toggle design

Mold & Trim Presses

Bruno mold & trim presses are controlled by four interactive variables that must be precisely controlled.

Our specialists have a thorough understanding of the detailed parameters involved and will work with you to design and manufacture the press that best suits your unique needs.

For more details visit us online at brunosystems.com.

Parts & Service

Help is just a call away! Experience the quality standards and customer service that keep Bruno presses at the top of the manufacturing line!

Our Bruno team of experts supply the full range of maintenance and repair services along the entire life of your machines – all from a single source.

We will identify and implement cost effective repairs to get you back up and running quickly. Plus, we can maintain your equipment to help avoid downtimes and cut unnecessary costs.

The Bruno service department can remotely connect to your machine to help diagnose problems. We can also make changes to your system remotely to help with your production processes.

Maintenance contracts are available to help avoid downtime and can be designed around your company's needs, with either quarterly or monthly visits. (By signing up for this service, you also receive a discount on labor rates and OEM parts.)

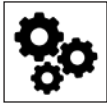

Bruno presses are built simply and powerfully – minimizing downtime and maintenance costs.

Hydraulic & Electrical Upgrades

Install current hydraulic and electrical technology in your machines to raise performance, minimize downtime, and increase safety!

Press Rebuilding

Make your old press new again! Our experienced and professionally trained staff will inspect, report and complete the correct rebuilding process for your machine.

About Bruno Associates

Bruno Associates is a world-class OEM of hydraulic, mechanical, and hydraulic-mechanical presses with over 60 years of experience. Our presses convert many different materials in a large variety of industries.

The Bruno commitment to quality, performance and customer service has given us a reputation as one of the top manufacturers of presses in the world. The quality and diversification of Bruno products has allowed our customers the accuracy and performance to succeed in today's competitive markets.

Bruno presses are designed and manufactured in the U.S.A. by our professional staff of engineers, machinists and mechanics and serviced by Bruno's own parts department and service technicians.
